## 86mm Size Radio Receiver V1.0

AC205-01 86mm Size Double Route Radio Receiver

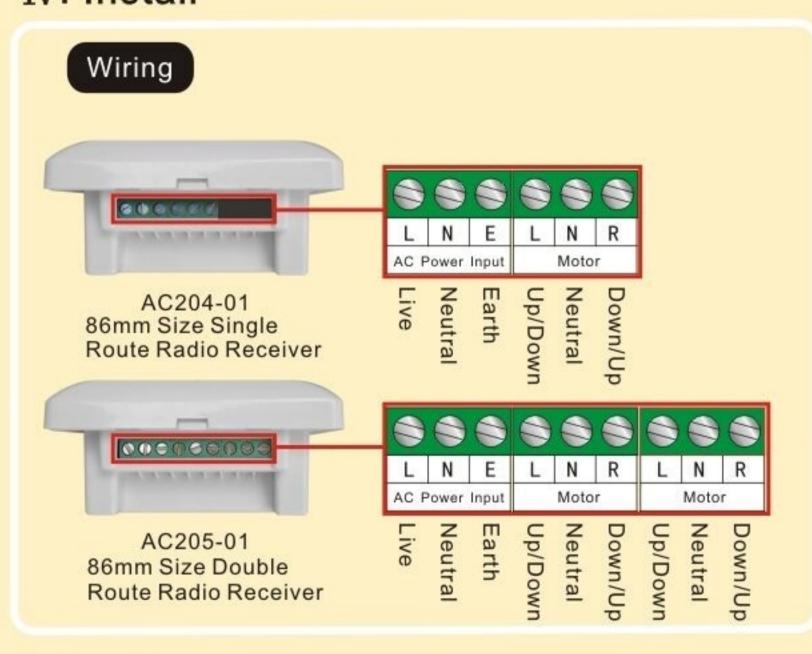

## I. Features

- Work with transmitter and tubular motor;
- 86mm x 86mm in Mounting Size;
- Fancy shape with design patent;
- Assembled by SMT precise automatic processing with damp-proof technique;
- In compliance with Fire-proof requirement by Electrical Standard;
- 5-minutes continuous working time;
- Shock-proof relays special for motors.

## II. Parameters

Model No.	Rated Voltage	Working Temp.	Loading Power	Frequency	Sensitivity	Receive Capacity	Operation	
AC204-01 AC205-01	220VAC 50Hz ±10% 110VAC 60Hz ±10%	-40°C~+85°C	≤300W	433.92MHz	-110dBm	≤20pcs transmitter	Remote/Manual	

## IV. Install

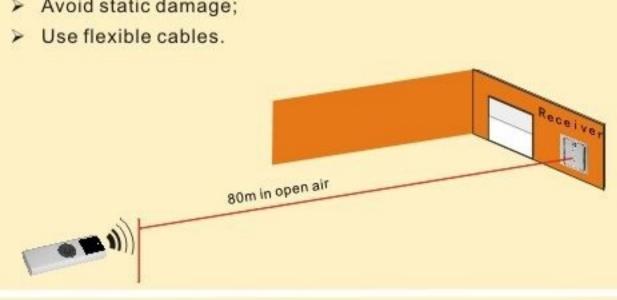

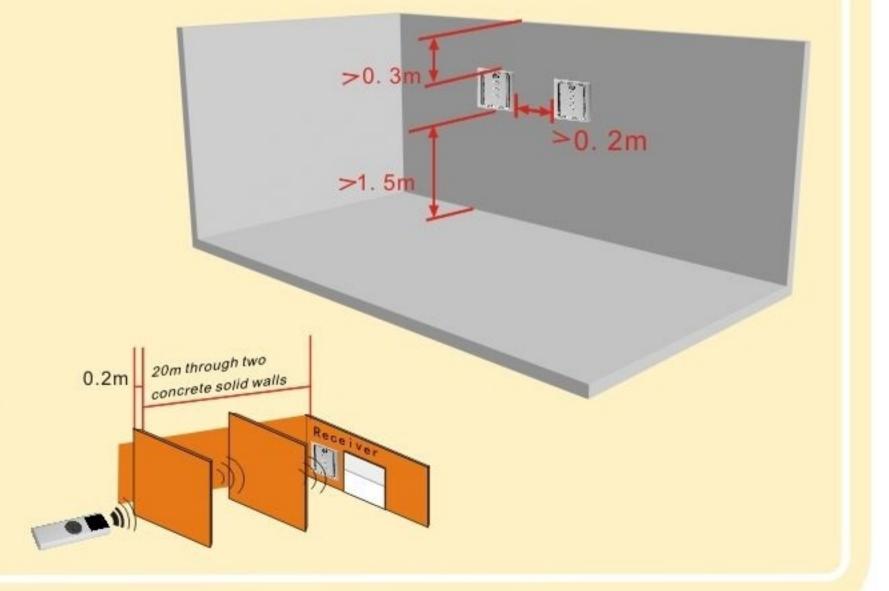

## Remarks:

- Besides checking power supply, follow below items;
- > To make good control range, avoid influence of metal parts;
- Control range:800cm in open air;
- ➤ The range between receiver and floor: ≥150CM;
- ➤ The range between receiver and ceiling: ≥30CM;
- ➤ The range between each two receiver: ≥30CM;
- Cut off power before wiring;
- Avoid static damage;

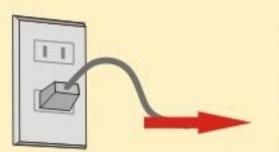

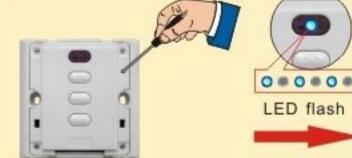

## V. Operation

- \* If you use multiple channel transmitter, choose the channel first (If use single channel transmitter, no need choose the channel);
- Motor running time 5 minutes, UP/DOWN switch delay time is 500ms.

## Program preparation

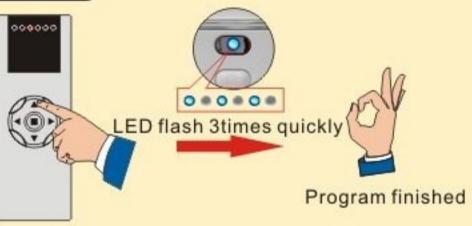

Power on Receiver

Press "PROGRAM" button on receiver

Press "STOP" on receiver for 1.5's within 10's.

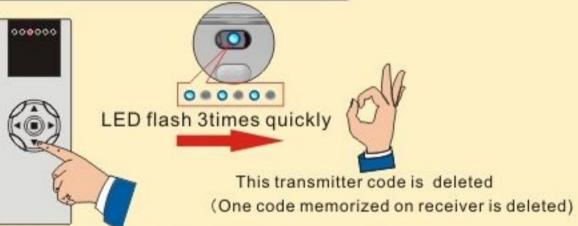

Receiver is in the condition of "Program preparation" (If no operation within the following NEW 10's, it will go back to initial status)

#### **Program**

Receiver in the condition of "Program preparation", press "UP" on transmitter

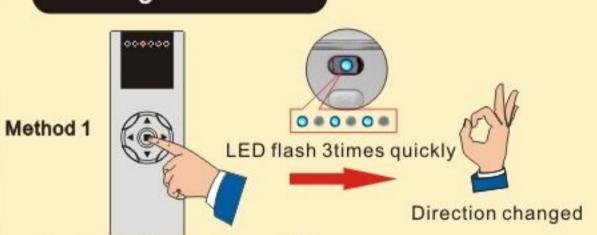

#### Delete one code on receiver

This transmitter code is deleted

Receiver in the condition of "Program preparation", press "DOWN" button on transmitter

#### Change direction

Receiver in the condition of "Program preparation", press "STOP" on the transmitter

# Method 2 Power on receiver

Power on Receiver

Press and hold on "UP" & "DOWN" on receiver together for 7's

#### Delete all codes on receiver

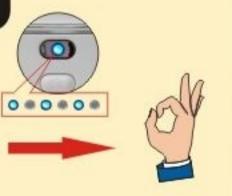

"DOWN" on receiver together for 7's

Switch "continuous run mode to "dot move mode"

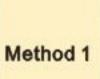

Get into "dot move" Press and hold on "UP"&"STOP" mode

#### Dot move mode

In dot move mode, press "UP" or "DOWN" on receiver shortly (<1.5s), motor will move dot by dot.

In dot move mode, press "UP" or "DOWN" on receiver shortly (<1.5s), motor will move dot by dot.

#### Continuous run in dot move mode

on receiver together for 7's

Method 2

In dot move status, press "UP" or "DOWN" on receiver(>1.5s), motor will move continuously

In dot move status, press "UP" or "DOWN" on receiver(>1.5s), motor will move continuously
